

What Makes Everest Different?

COLD FUSION

PROPRIETARY AND PATENTED TECHNOLOGY

SUPER CHARGE YOUR ICE MAKER!

What is Cold Fusion?

Instead of excess chilled water being dumped down the drain like our competitors, our Cold Fusion technology recycles that water to be used to chill incoming warm water creating more ice, using less electricity and extending the life of the ice maker.

What are the benefits of Cold Fusion?

Up to 30% more ice created everyday*

Electricity savings up to 30%*

Can create up to 100,000 lbs more ice every year**

*Increased production and power usage is based on an icemaker equipped with the Everest Cold Fusion component vs. an identical icemaker without **100,000 pounds more ice / Yr. based on 1800 Pound/Day icemaker
